

SGIP Residential Solar and Storage Equity Supplemental Cost Verification Form

This form is required because the cost of the solar and storage or standalone storage system exceeds 100 percent of the system's size maximum incentive provided by the Self-Generation Incentive Program (SGIP). The SGIP Program Handbook explicitly lists what are eligible project costs in order for an application to be valid. Applications that exceed 100 percent of the system's size maximum incentive must demonstrate that the costs are supported by eligible project costs in the SGIP Program Handbook or the incentive may be reduced.

This form requires first that the developer and any system owner company fill out and sign the form and second that the form is sent to the host customer. ALL portions of this form must be filled out and signed.

SGIP Application Number: _____

Justification for Why Proposed System Installation Costs Exceed 100 Percent of the System's Size Maximum Incentive (to be filled by the developer):

Verification of Customer Out-of-Pocket Costs (to be filled by the developer or system owner company):
